PROJECTS COMPLETED

- 6 months - Product recommendation System : Use of Templates for E-commerce site and added Recommendation System from scratch using various filtering techniques and algorithms like Collaborative filtering , Content-based Filtering and cluster models.
- 3 months - UX/UI Design for Central fitness: Created web designs using Figma and Adobe XD.
- 6 months - E-commerce website: Created E-commerce site using Django, HTML, CSS, Javascript and Bootstrap.
- 6 months - Online Grocery Store application as well as website: Created online grocery store named "Grand Pantry" using Kotlin for Mobile application and React, Node JS for Website.
- 5 Months: Redesigning UI/UX for the AutoWiki, the world car database website to new modern look and feel passing the usability test. Figma is used for designing and prototyping. The new design focuses on making one of its major feature "Search" more easier for the car enthusiast. Autowiki is the World Collector Car Database! The mission is to create a world database of individual classic, collector, and other special cars based on VIN/ chassis numbers. Together with the contributors, it creates a digital archive of every single car with a complete history!
- Since - December 22, 2022 (1.4 Years): Design dashboard proto-type using Figma for existing learning content creation tool Lesling. Creating new design for company and admin dashboard.
- Since - December 19, 2022 (4 Years): Worked as a team member for frontend development which includes creating new designs, design improvements, and ensuring responsiveness, design testing using HTML, CSS, and

Bootstrap5. JUSTIS is a web portal of CAP that is under an international insurance company Allianz. It is maintained in Oracle and Zend framework3. Clients can create insurance, pay invoices regularly and claim legal cases digitally in one platform easily. Various JUSTIS staffs can also login into their respective dashboard and do their regular work. They can coordinate with other staff members and well as communicate with clients.

- Since - January 1, 2023 (7 Months): Create new UI/UX to implement new designs of the existing website <https://eindexamensite.nl/>. The new design adds modern look and is more user friendly. Used Figma for designing and prototyping. There was about 20+ pages to design including teachers dash board, question & answer pages, student result page etc. Eindexamensite is a highly popular exam practice platform in the Netherlands, catering to students from various educational levels such as VWO, HAVO, HBO, and more. It offers a range of features that benefit both teachers and students.
- Since - October 10, 2022: Create an application for activating an account or password forgotten flow for Mitchell & Butlers using the colors/logo etc of the existing screens and for European Central Bank.
