PERSONAL PROFILE

- Motivated web developer with a solid grasp of modern programming practices and web-based engineering. Blends technical know-how with creative thinking to turn ideas into functional, well-documented web solutions. Thrives in collaborative environments, values clean code, and always looks for smarter ways to solve problems.

EXPERIENCES – 10 YEARS

- Web Developer with 10 years of experience building responsive, user-focused applications using Angular and PHP frameworks like Laravel and Yii. Skilled in modern frontend technologies including TypeScript, JavaScript, and Angular Material, and experienced in integrating third-party tools such as payment gateways and mapping services. Brings a strong understanding of web architecture, clean code practices, and version control workflows.

PROJECTS COMPLETED

- F-Sensing (Worker Safety Monitoring App). Angular, Firebase. Developed a safety monitoring application aimed at minimizing risk for workers operating at high altitudes. Utilized real-time data collection and cloud integration via Firebase to track and assess safety metrics. Enabled live risk alerts and reporting to help organizations enhance their safety compliance.
- Dental Management System. Angular, Angular Material. Built a streamlined system for managing dental product inventory. The application focused on efficient stock tracking, categorization, and supply monitoring to help clinics and suppliers manage resources effectively. Designed a user-friendly interface with Angular Material components for improved usability and navigation.
- Human Resource Information System. Angular 14, ng-bootstrap, Leaflet, HighCharts. Developed a comprehensive HR management platform covering the full employee lifecycle—from recruitment and onboarding to appraisals and offboarding. Key features included user and role management, attendance and leave tracking, payroll integration, and interactive dashboards with data visualization using HighCharts. Integrated map-based tracking using Leaflet for location-based HR operations.
